DESIGN RATIONALE

# Paper, ink and one line on the field.

Sideline is used in the worst five minutes of a season, so the design starts from tools already on the field: a trainer’s clipboard, chalk lines, the hash marks every coach reads without thinking. Paper and ink carry almost everything. Vermilion appears only when someone must act; pine only means “within the athlete’s own range.” A serif headline gives each screen one calm sentence, SF Pro does the work, and SF Mono holds every number so values read as measurements. The symbol is a pupil on a sideline, broken by two hash marks that suggest an S. Every status uses shape as well as color, so it holds up in sunlight, in grayscale and for color-blind users. The three roles share one system and change only density.

01 · LOGO

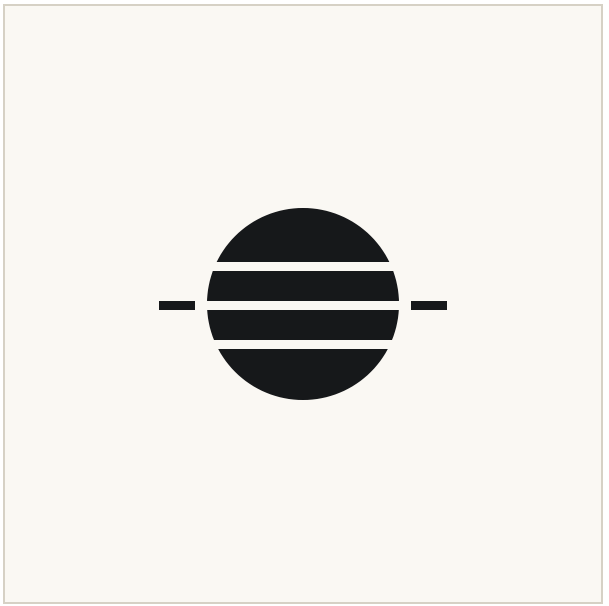

# Three rough directions

A

### Hash-mark pupil

A full iris on a field line. Clear idea, but the ring and line merge below 40 px and it drifts toward a generic eye.

B

### Yard-marker pupil

A pupil cut by yard lines. Strong at size, but it reads as a striped ball or a planet, and the lines fill in at 29 px.

C

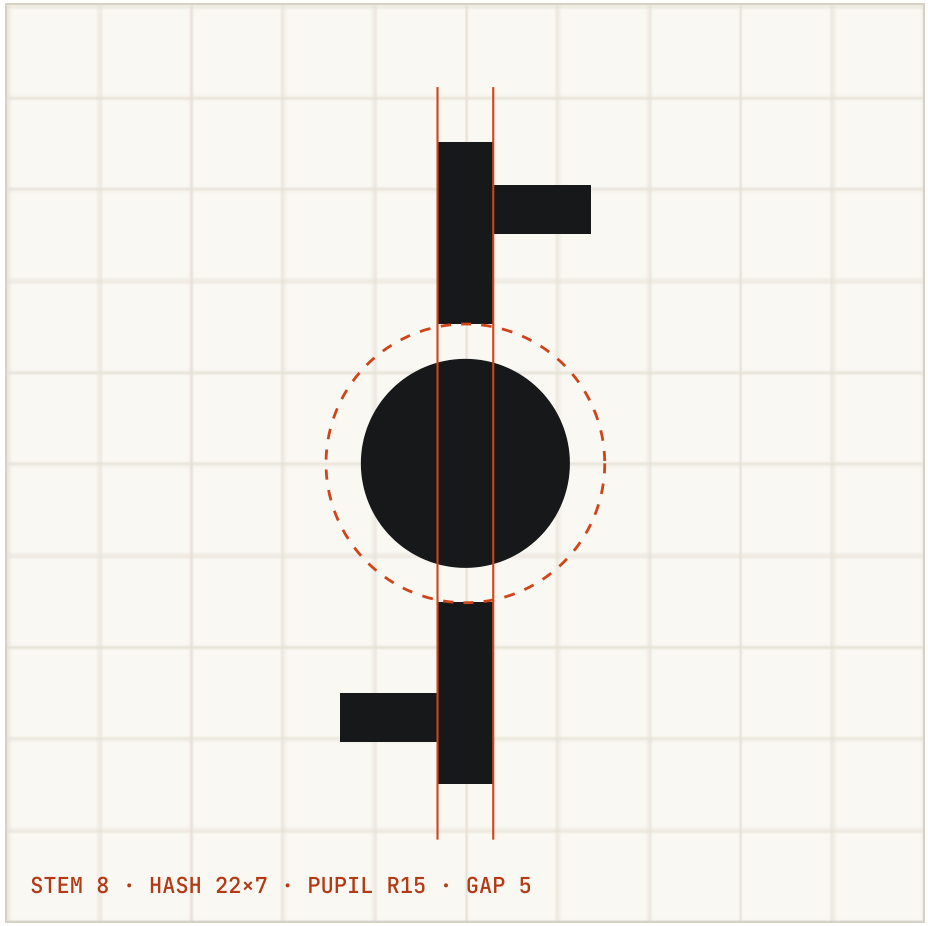

### The i as a field line

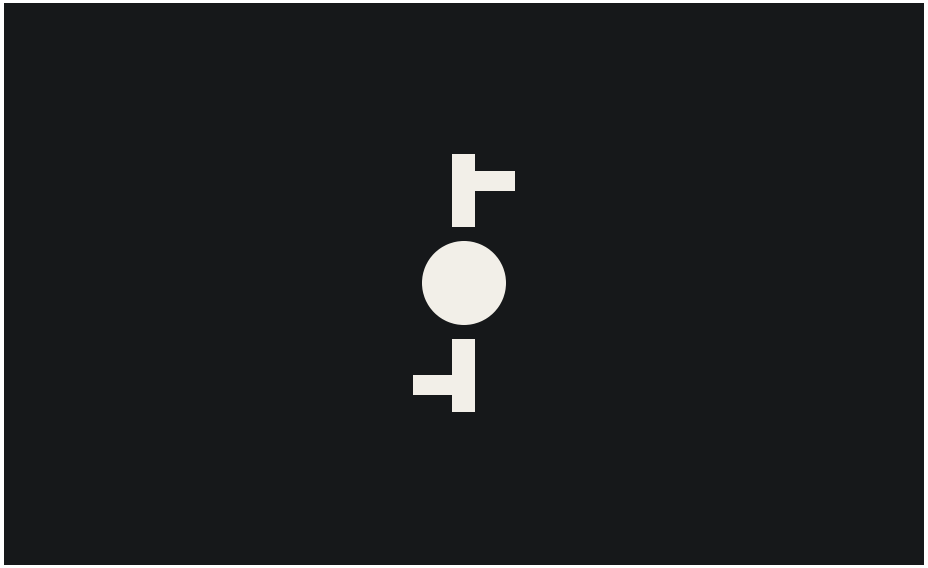

Elegant in the wordmark, but it has no symbol of its own for the app icon.

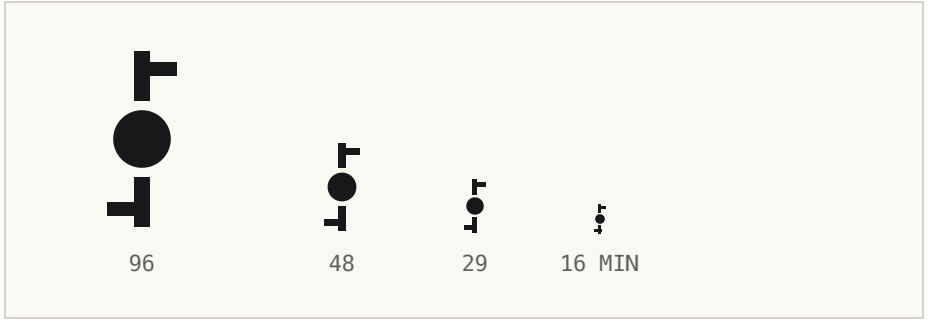

REFINED · FROM A + C

# The sideline pupil

The ring is gone; the gap around the pupil does its job and survives small sizes. The two hash marks point in opposite directions, so the line reads as a sideline and the whole mark hints at an S. Built on a 100-unit grid from four rectangles and one circle.

LOCKUPS

# Wordmark & lockups

Wordmark: Newsreader Medium, tracking −1%. Symbol height equals 1.35 × cap height, centered on the x-height. The wordmark is shown as live text; outline it before final release.

STACKED

SYMBOL ONLY

ONE-COLOR BLACK · #000

ONE-COLOR WHITE · #FFF

REVERSED ON FLAG

Campaign and demo-video use only, never inside the app.

IOS APP ICON

# 1024 px, full bleed

Ink square, paper mark at 62% of the canvas, no transparency, no baked-in corners (iOS applies the mask). Dark variant swaps to the dark surface; tinted variant is a grayscale mark iOS recolors.

RULES

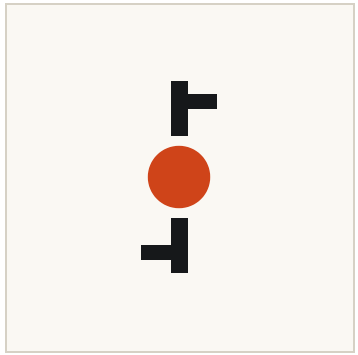

# Clear space & minimum size

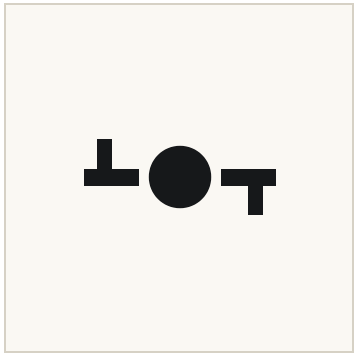

| | |
|---|---|
| Clear space, all sides | `x = pupil Ø` |
| Symbol, digital | `16 px` |
| App icon, smallest (Settings) | `29 px` |
| Primary lockup, digital width | `96 px` |
| Primary lockup, print width | `25 mm` |
| Billboard / banner | `no maximum` |

MISUSE

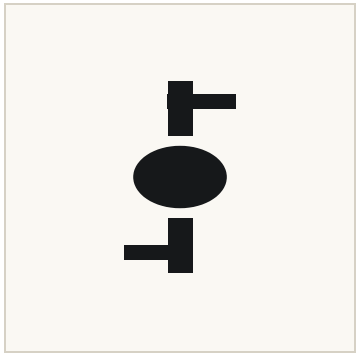

# Don’t

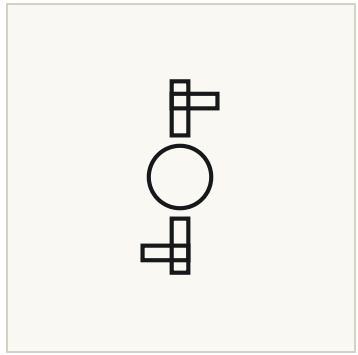

Color the pupil flag. It reads as an alert.

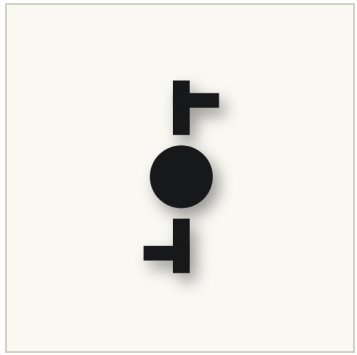

Rotate it. The sideline is always vertical.

Stretch or squash it.

Outline it or add strokes.

Add shadows, glows or gradients.

Retype the wordmark in another font.
